### Minors

Maastricht University implements UM-wide minors that are open for (almost) all Maastricht University bachelor's students. These minors offer you the opportunity to get acquainted with a different field of study. A minor consists of several courses which together provide an excellent introduction to another specialisation or part of it.

**Please note:** the application process for the academic year 2020-2021 opens at 1 June 2020

You can follow a minor in the fifth semester of your bachelor's programme. Most UM-wide minors are approximately 24 ECTS.

**Create a minor about sustainability?**  
Since UM is dedicated to become a more sustainable university, we want to offer more courses on sustainable development because of that. So please let us know and fill out the questionnaire.

## Electives in the Bachelor 2021-2022

**Introduction**

In periods 1, 2 and 3 of the 3rd-year of the Bachelor, you are given the opportunity to take electives. It may consist of four independent elective courses offered by FPN. You can also take courses or minor programs outside FPN, for example at other faculties or universities. You have to obtain a total of 24 European credits (ECTS) for your elective program.

Grades obtained for FPN electives are not used in the calculation of the [GPA](#). This also applies to non-FPN students.
