APPENDICES WITH THE EDUCATION AND EXAMINATION REGULATIONS BACHELOR IN PSYCHOLOGY

Appendix 1 Accountability for the language of instruction

The choice for the language of instruction of the Bachelor in Psychology is in line with the UM Code of Conduct on language in accordance with the Dutch Higher Education and Research Act (WHW) art. 7.2. Because of the specific educational nature and profile of the Bachelor in Psychology, teaching and examinations are conducted in Dutch and English. The programme offers a Dutch language and an English language track. Students have freedom of choice regarding the language track. This guarantees the quality of education, because:

- **The programme prepares students for a (inter)national master's programme and for the (inter)national labour market. Therefore, the content of the programme has a national as well as an international orientation and focus.**

Labour markets within the region of Maastricht University (positioned within the Euregion) go beyond borders, and many large companies in this region are international. The bachelor's programme fulfils the (inter)national and domain-specific requirements specified for a bachelor's programme in psychology, and offers students up-to-date knowledge, methods and skills that will allow them to continue studying in a master's programme. Moreover, with the use of the English language, also in the Dutch language track, the programme prepares the students for a national and international master's programme and labour market. Furthermore, the bachelor's programme is research-oriented within the field of psychology. Psychology is an international discipline, implying that most scientific literature is in English. For students aiming to pursue a clinical master's programme in the Netherlands, it might be essential to master specific skills in Dutch. Therefore, tutorial meetings, skills training and exams are offered in Dutch for students enrolled in the Dutch language track, and in English for students enrolled in the English language track. Joint lectures are offered in English, as are also the literature and the course manuals.

- **The academic community (including the programme's teaching staff) is internationally oriented.**

The Faculty has naturally grown into an international and diverse community. The international community facilitates the quality of the education and research at our faculty. By offering education in English, we can recruit high quality staff on an international level, and thus be more selective regarding our quality standards for staff members.

The Faculty of Psychology and Neuroscience also fosters internationalisation and diversity within the programme. This enables the students to obtain competencies related to communicating with people from various backgrounds and learn about inclusivity in an international classroom. Offering English education facilitates more diversity within the student population and this

within the problem based tutorial groups (PBL). In order to develop the intercultural skills even further, the programme regards a period of study abroad as a valuable learning experience for the students. The Faculty of Psychology and Neuroscience has agreements with over 80 renowned foreign universities. Every year, over 200 students take electives abroad and about 120 foreign exchange students study at the Faculty of Psychology and Neuroscience.

- **The student intake and current population is internationally diverse and Dutch and English are the common language.**

The yearly intake in the bachelor's programme represented 46 nationalities in 2020-2021.

Appendix 2 Implementation Regulation Exchange Programme and Electives Abroad

- 1) Courses, obtained as part of an exchange programme as established by the Faculty Board, may be registered as part of the programme for which the student is enrolled.
- 2) Students, who want to take the year 3 electives abroad, have to do this in the context of the Exchange Programme of the Faculty with one of its exchange partners.
- 3) Electives abroad are taken during the regular elective period in year 3 (P1-3), for a maximum of one (1) semester.
- 4) Study completed in the context of the Exchange Programme is part of the study programme at the UM.
- 5) The selection procedure for electives at a partner university abroad is done by the International Relations Office (IRO). The selection takes place in year 2 of the Bachelor programme (fall). For participation in the selection, students need to have passed all first-year educational requirements at the time of the registration deadline. For more information about the selection procedure and deadlines, please refer to <https://www.askpsy.nl/iro>. Students who didn't fulfil the requirements for participation in the regular selection procedure at the time of the registration deadline, can still apply for electives at an FPN partner university abroad as soon as all first-year educational requirements are fulfilled.
Allocation is done at a first-come, first served-basis, based on availability.
- 6) The bachelor diploma cannot be issued before module PSY3378 (Intercultural Awareness) is completed and the ECTS obtained abroad have been processed, based on an official grade transcript from the host university.
- 7) Students are selected on a provisional basis. To get approval from the Board of Examiners to take electives abroad, apart from year 1, all educational requirements of period 1, 2 and 3 of year 2 and the research participation need to be completed at the latest 6 weeks before the start of the exchange programme. For more information about the requirements for electives abroad, please refer to the Elective Guide on <http://www.AskPsy.nl/electives-bachelor>.
- 8) In relation to the requirements regarding level and content applicable to the examination of the programme concerned certain conditions apply. The decision to whether or not a course will be considered as part of the programme will be determined by the Board of Examiners and will only be possible with the approval of the Board of Examiners. The following conditions apply:
 - a) the course has to be taught at an academic level and at least at a second year level;
 - b) there is little or no overlap between the course and other parts of the bachelor's programme while the content has to relate to the purpose of the bachelor's programme (Article 3.1 of the Education and Examination Regulations);

- c) the course has been passed in the context of the exchange programme;
 - d) students have to ask approval from the Board of Examiners in advance and in writing.
 - e) when requested by the Board of Examiners, students will have to submit additional information to the Board of Examiners.
 - f) if electives abroad are offered and taken in a language other than the native language or English, a maximum of 6 ECTS can be awarded for a language course in the language in question, provided that a minimum of 12 ECTS have been obtained for electives in that language.
- 9) Regarding the processing of results obtained abroad by the Board of Examiners the following rules apply:
- a) results obtained abroad will only be registered if the module PSY3378 (Intercultural Awareness) has been passed;
 - b) results must be submitted to the Board of Examiners in clear, original, written transcripts from the university in question; these transcripts must contain the following information -aside from personal information about the student and the university-: code and name of the course, course level, study load, exam date and exam result;
 - c) registration is only possible in case of a sufficient result; course results stating that the course was taken or attended or similar assessments are not sufficient. A result that is (in)sufficient at the university in question will also be considered (in)sufficient at FPN;
 - d) the study load awarded by the foreign university is adopted here without changes; if for example 6 ECTS have been awarded by a particular university, the course will also be valued at 6 ECTS by the faculty, regardless of the degree of difficulty that has been experienced;
 - e) when the study load abroad is not expressed in ECTS but in other units, the Board of Examiners will convert these into ECTS. The conversion is based on the study load of a complete study year or a complete programme in relation to the study load of 60 ECTS for a year in Maastricht or 180 ECTS
- 10) The Board of Examiners will decide on matters regarding registration of courses followed elsewhere, as far as they have not been addressed in the Education and Examination Regulations and in this article.
